

Medical Education & Simulation SSP

Grow Your Skills Beyond the Floor

Inspire learning. Build capability. Improve emergency care.

Hornsby Hospital offers **2 Special Skills Positions every 6 months** for **ACEM trainees** with a strong interest in **medical education** and **simulation**. These unique 6-month full-time roles combine: - **0.5 FTE Emergency Department- 0.5 FTE Medical Education / Simulation**

Why apply?

This is an opportunity to: - Gain focused experience in **medical education and simulation** 🎓 - Build skills in: - Teaching - Debriefing - Curriculum and course design 📅 - Leadership - Quality improvement - Work with experienced educators and simulation faculty - Contribute to innovative educational programs across the Emergency Department and wider hospital and continue developing as an **Emergency Registrar** 🩺. Both trainees will complete the comprehensive simulation instructor course at Sydney Clinical Skills and Simulation Centre (SCSSC)

Who should apply?

Ideal applicants are: - **TS3 or TS4 ACEM trainees**- Interested in becoming future **clinician educators**- Passionate about education and simulation - Motivated to teach across diverse learner groups - Keen to contribute to innovation, training and quality improvement. Applicants will preference one of two positions.

MEDICAL EDUCATION with Simulation / ED

Based in the Emergency Department

The Opportunity

Develop the skills and knowledge required to become a confident medical educator, with a focus on targeted teaching programs aligned to learner needs.

You will gain experience in: - Medical education theory - Teaching across multiple learner groups - Designing and delivering education sessions utilising simulation as a learning tool- Weekly HKH ED in-situ simulation - Feedback and debriefing - Collaboration with PMASC on hospital-wide simulation programs

Examples of previous projects and experiences

- Weekly Insitu ED simulations
- ECG and ABG training module development
- Registrar simulation training days
- ED staff training days - Workshops and simulation
- HNRP programs: Airway Emergencies, Neonatal Skills, Paediatric workshops
- QI projects: ED in-situ simulation review and Emergency communication skills improvement
- USYD SMP medical student tutes and simulations

SIMULATION / ED

Based in the Pamela Margaret Andrew Simulation Centre (PMASC)

The Opportunity

Build confidence and practical expertise in simulation-based medical education, from scenario design through to course delivery and debriefing.

You will gain experience in: - Scenario design - Course organisation and logistics - Course directing - Technical delivery of lab-based simulation - In-situ simulation delivery - Debriefing - Educational theory underpinning simulation-based learning - Hospital-wide quality improvement projects

Examples of previous projects and experiences

- Systems testing programs for latent safety threats
- Training linked to the opening of a new HITH clinic
- Deteriorating patient pathway simulation
- Multidisciplinary hospital-wide MTP project
- ED registrar training sessions
- HNRP training days
